

# The complete BUSINESS SOLUTION developed **LOCALLY**, acclaimed **INTERNATIONALLY**

atACC is a complete Accounting and Inventory Control Package developed exclusively to manage the Accounting and Inventory of all sorts of business concerns including small firms and large business organisations. The objective behind the development of atACC was the creation of a full-fledged accounting software that could be operated even by a layman who is totally ignorant of Accountancy. atACC is thus developed as a complete user friendly software empowered with several other unique features which are considered essential for any

business concern. The foreign currency transaction facility of atACC has made it a highly recommendable product in overseas market. This is one of the reasons among several others like high quality and excellent performance that brought atACC, the prestigious product of Atlanta, several orders from clients all over India and Middle East within a very short period of its launch.
